- Entrepreneurship
- Team Leadership
- Team Building

EXPERIENCE

Devslopes
Web Developer   July 2016 - November 2018

I built from start to production, 10+ front-end web projects for Devslopes. This included Devslopes primary product website, a cryptocurrency website which handled token sales globally, a prototype for a decentralized front-end Angular Electron app and co-instructed Devslopes online web development training course which has over 92,000 enrolled students.

SLConnected
Web Developer & Project Manager   October 2015 - June 2016

I lead the development of all front-end web projects. This included the development of multiple client websites, project management and design. I also architected and built a large scale SaaS application built with Angular & PostgreSQL.

CirrusOps
Contracted Web Developer   July 2015 - September 2015

I was contracted to build a single piece of software for managing data. I built this application using Angular, Bootstrap, AWS and the Mandrill API. The app managed image uploads/downloads, tagging, categorizing, filtering and email notifications.

Fryza LLC
Lead Project Manager   March 2012 - June 2013

I was the Lead Project Manager and designer for 15 mobile apps. This included working directly with clients, creating written requirements, designing project wireframes and directly communicating with the developers and artists throughout the entire development phase.

EDUCATION

In-person Web Development Bootcamp   April 2015 - July 2015

This was an intensive project-based (MEAN Stack) web development bootcamp that taught the basics of Angular, Node, Express, MongoDB and Bootstrap.
